Continued Troubles at Rome-Foreigners The Possibility and Peculiarity of Female Quitting the City. Priendship.

Dinah Maria Muloch writes thus of the The London Times's Rome correspondent friendship of Women:

of Holy Week were leaving in disgust. New
domiciliary visits and arrests were making,
and the people were becoming incensed
against the government. After alluding to
the bloody scenes which took place ou the

"There is every reason to believe that the Papal Government, not sated with the blood that was split in the Corso on Monday, the 19th, had been trying to excite the people to new disturbances toward the end of last week, and especially on Sunday last, when it was expected that the Corso would be, as usual, swarming with promenaders. On Saturday, the 24th, printed bills were seen stuck ap at the street corners, which said, "Romans, do not to-morrow bring the woman with you nor yet the children, for we must have our revenge." Elsewhere I read, "Gendarmes! to-morrow we await you at the Corso!" Up to a late hour in the morning of Sunday I saw these bills with my own eves in the Corso; and yet, mark well! the Gorso had been all the foregoing night like an encampment, thronged with troops of every description. Toward five on Sunday morning two guns went out of Porta Angelica, and were taken round to the barracks of the Plazza del Popolo—a clear hint of the precautions taken by government, which harbored designs evidently in the stake of King Rombe. In the

Number One—from its total absence of sentimentality, its undemonstrativeness, depth, and power, a friendship between two men is a higher thing than between any two women—nay, one of the highest and noblest acts in the whole world. Precisely as were comparisons not as foolish as they are odious, a truly good man, from the larger capacities of male nature both for virtue and vice, is, in one sense, more good than any good woman. Yet, though dissenting from much of the romance talked about female friendships, believing that two-thirds of them spring from liering that two-thirds of them spring from mere idleness, or from that besoin d'amier which, for want nf natural domestic ties, makes this one a temporary substitute, Heaven forbid that I should so malign my sex as to say they are incapable of an emotion which, in its right form and place, constitutes the

strength, help, and sweetness of many, many lives; and the more so because it is one of the sweetnesses we know.

Probably there are few women who have Popolo—a clear hint of the precantions taken by government, which harbored designs evidently in the style of King Bomba. In the morning, however, nothing happened. The tanners, who really thought those bills had been stuck up by the Liberal Committee, were preparing for vengrance. The same did the Transfeverini, the Montigiani, the popolani of every description. These same bills had been spread in the adjoining country, so that from several villages men in arms came to town to have their ranache." not seen some first friendship, as delicious and almost as passionate as first love. It may not last—it seldom does; but at the time it is one of the purest, most self-forgetful, and self-denying attachments that the human heart can experience; with many, the near-est approximation to that feeing called love est approximation to that feeing caned love— I mean love in its highest form, apart from all selfishness and sensous and sensousness— which in all their after life they will ever know. This girlish friendship, however fleet-ing in its character, and romantic, even silly, in its manifestations, let us take heed how we make light of, lest we be mocking at things

I have the very best authority for stating that the Sovereign Pontiff is to have in his service an Irish military brigade. Ere many weeks clapse you will see an Irish military force in the service of the Holy Father. The brigade originated in the most natural way imaginable. The construction of a railway to Acona, under the management of an English contractor, led to the introduction into the Papal States of a huge number of hulking "naveres—every man from Ireland. The Irish naveres determined one fine morning to quit the work, and exchange the shovel for the fire-lock; in other words, the Irish haborers volunteered to serve his Holiness as soldiers. This perfectly bona fide offer has been made. These "naveres" are the nucleus on which a more sacred than we are aware.

And yet, it is not the real thing—not friendship, but rather a kind of foreshadowing of love, as jealous, as exacting, as unreasoning—as wildly happy and supremely miserable; ridiculously so to a looker-on, but to the parties concerned, as vivid and sincere as any after passion into which the girl may fall; for the time being, perhaps long after, coloring all her world. Yet it is but a dream, to melt away like a dream when love appears; or if it then wishes to keep up its vitality at all, it must change its character, temper it. all, it must change its character, temper its exactions, resign its rights.

"Love is sweet. Given or returned;"

and so is friendship; when, be it ever so inti-nitesimal in quantity, its quality is unadul-terated, springing, I repeat, as women's friendship almost always does spring, out of friendship almost always does spring, out of that one idea'd impulsiveness, often wrongheaded, but rarely evil-hearted, which makes us at once so charming and so troublesome, and which, I fear, never will be got out of us till we cease to be women, and become what men sometimes call us—and they well know they give us but too much need to be related by the presence of the

PRESENT CONDITION OF ROME—ITS GREAT DECLINE.—The narrow limits that have been set aside as the territory over which his Holi-ness the Pope may hold his temporal and civil, as well as spiritual sway, is the least productive of any part of Italy. The Eternal AN UNFORTUNATE LADY.—The Boston Courant says that a few days ago, as we were crossing the street with a friend, we passed a young lady dressed in the highth of fashion, who, unfortunately, displayed an enormous hole in the heel of her stocking. "Why," asked our friend, "may that young lady be called an object of charity?" We replied, "that she hadn't got a darned stocking to her fact." productive of any part of Italy. The Eternal City, although situated for a great commercial metropolis, has not enough commerce to sustain a hundredth part of its population. The inhabitants depend almost entirely on the foreigners who temporarily visit them for the rent of rooms, the sale of fruits and flowers, of sacred relies and curiosities, as subsistence. The Tiber, upon which once floated the ships of Egypt and Southern Europe, is so filled up that only small flat-bottomed boats can navigate it; and the great Campagna, which was once the vineyard of Italy, has become reduced to an almost barren condition. The Pope's army consists of 8,000 soldiers, 2,000 dragoons stationed at Rome, 2,000 riflemen and 4,000 Austrian and Bavarian troops stationed at Maccrata. Another Duel in New Obleans.—A hostile meeting took place at the Oaks on Monday, between F. Claiborne and W. Foley. The weapons used were pistols, distance ten paces. After the first fire, which resulted in the coat tail of Mr. Foley being pierced with a bullet, the matter was honorably adjusted. The difficulty which led to the meeting, was brought about by some trivial misundestanding. Bavarian troops stationed at Macerata.

A Mysterious Vessel on the Coast of Ineland,—The good people of Cork, in Ire-land, are greatly exercised in their minds by a mysterious craft which has been lying in handred inside and several thousand outside spectators witnessed the spectacle. The bal-loon was hat seen going in a north-east direction, somewhere apparently over As-toria. It was his intention to descend before offing of the man-of-war roads at Que the offing of the man-of-war roads at Queenstown, for nearly four months. This vessel, which, except that she is apparently stationary, might well be believed to be the "Flying Dutchman," is a rakish clipper of seven hundred tuns burden, halls from Philadelphia, is called the Charles B. Truitt, and has on board a cargo of finely finished rifles. The Irish correspondent of the London Times has called attention to her existence, and to the profound mystery which enshrouds her. chael Knappick, a person of prominence, and well known to the Germans of Chicago, per-ished miserably in a ditch several days ago, being too old and feeble to extricate himself from the excavation into which be had fallen.

OLD Plates Made New.—A rolling-mill at Chicago has orders for 10,000 tuns of rails for the Illinois and Wisconsin roads. Another gang of men will commence in Wyandotte, May 1, with a six months slock, oders having been received for 5,000 tuns of rails for the Michigan Central, Michigan Southern, and Sandusky and Dayton, and a small amount from other roads. There will be mixed with the old metal 3,000 tuns of new Lake Superior and senap iron, making a quality of rail the same as that placed on the Michigan Central for some time past.

SINGULAR PHENOMENON.—A man who assisted to empty several bottles of wine, afterward took a walk. The pavements were quite icy, and he exclaimed, "V-v-e-y sin-lar; wh-whenever water freezes it alw's freezes with the sl-slippery side up."

Parisina Fashiens for May.

In spite of a few bright days of wonshine, which promised to herald the advent of spring, the continuance of chilfy, easterly winds gives warning of the risk of incutiously laying aside warm cloaks and shawls. Consequently, in outdoor dress velvet pelisses and paletota are still the favorite wraps for the deviscion. Many are made of black silk, and trimmed with ruches of the same. In Paris, however, it is much the fashion to employ violet or maroon for the ruches when the paletot or pelisse is of black silk; the sleeves were very wide, and usually lined with white or colored silk. The pelerine is always pointed at the back, the point descending as low as the waist. Purisian Rashions for May,

Bonnets have already assumed an aspect perfectly spring like. They are for the most part made of crape and velous epingle—the former white, and the latter of some bright ine. We may mention a very elegant bonnet, made of white crape and black velvet, having on one side a bine ostrich feather. Another has been made of manye colored crape and velvet, with a bird of paradise on one side.

For an evening head-dress the coiffure Italien is at present extremely fishlomable in Paris. Sometimes the plaque of black velvet is brought a little over the front of the head in point, and the velvet is edged with jet or gold; at each side bouquets of shaded roses. Nets, worn at the back of the head, still continue in favor. Those of gold, silver or pearls are most suitable for full dress; but others, intended for the plainer style of contume, are frequently made of very narrow chenfile or velvet.

For ball dresses lace tunies are considered very recherche; and overskirts of colored moire antique tunies of black lace have a very rich effect. The newest dresses of the season are all made excessively full in the skirts. In spite of all that is said about the abandonment of crinoline there seems to be at present no disposition to discard it among the elite of the Parisian fishion.

The side trimmings are formed of satin ribbon of the color of the dress. This ribbon is disposed in lozenges, gathered in at the points by rosettes of ribbon. The lower ones are finished by ends with silver fringe. The berthe and the sleeves are also trimmed with silver fringe, and under the silk sleeves there are puffs of white tulle. A WRALTHY MERCHANT'S WIFE COMMITS ROBBERY-HER CONFESSION OF A PUBLOINING Maxia .- In a store in Philadelphia recent MANIA.—In a store in Philadelphia, recently, a porte-monnaic containing eighty-five dollars was stolen from a muff which a lady from Wilmington, Deleware, had for a moment left upon one of the stools. The husband of the lady being apprised of the matter went on and traced the matter up. He found one of the missing notes, and ascer-He found one of the missing notes, and ascertaining that the wife of a wealthy merchant had passed it, went to ber house and charged her with the theft. Strange to relate, she burst into tears, freely acklowledged her guilt, but declared in the most emphatic terms that it was the first time in her life that she had been guilty of anything of the kind, saying that her husband was a respectable man and would make the matter all right. She re-marked that she could not imagine how she came to take the money, but that a vague and saw the porte-monnaic in the muff, and the next moment she found it in her hand. She spent, she said, but little more than half the "Yes."

A DESIRABLE RAILWAY LIGHT.-It is stated that the convenience of good steady light has been obtained in some of the first-class carriages on the East Lancashire Railway, Enland, by the use of gas. The meter from which the gas is supplied is contained in the guard's van. It is conveyed to the roots of guard's van. It is conveyed to the roofs of the carriages and through the usual lamp holes. There is one light in each carriage, which is sufficient to illuminate the compartment thoroughly, so that the smallest print can be read. The taps are on the roof, and cannot, therefore, be tampered with by the passengers. An iron gas pipe passes along the roof of each carriage so lighted, and the junction between the carriages is by means of a flexible tube, with a little slack to allow of vibration in the coupling and vibration from propulsion. The contrivance is very simple, and could easily be extended to a whole train.

Appearance and Extent of the Fine in Dismat Swamp.—The fire which has been raging for about a week in Dismal Swamp has been measurably subdued. The flames nearly reached the track of the Norfolk and Portsmouth Road, and at one time the care passed through the dense clouds of smoke with difficulty. Great exertions wer required to prevent one or two dwellings from being consumed. A gentleman who arrived from the swamp last evening, informs us that the flames are still raging furiously in some places. He represents the scene as very grand and imposing. The brilliant light, and even the smoke, any sometimes seen very distinctly from the city, presenting the appearance of an extensive configuration.—Norfolk (Va.) Argus.

SEVERE HAIL STORM.—A severe hall storm passed over Rising Sun, Ind., on Wednesday, damaging a large amount of property. Scarcely a building in the place escaped visitation, and apward of three thousand panes of glass were broken.

Excerpts from Distinguished Authors.

The mass of the people regard as profound only him who suggests pungont contradictions of the general idea. In rationization not less than in literature, it is the epigram which is the most immediately and the most universally appreciated. In both it is the lowest order of merit.—Edgar A. Poe.

The way to secure success is to be more anxious about obtaining it than about deserving it; the surest hinderance is to have too high an opinion of the discernment of the public. He who is determined not to be satisfied with anything short of perfection, will never do anything at all, either to please himself or others. The question is not what we ought to do, but what we can do for the best.—Hazilti.

Royal Rights and Privileges of the British

Etheliags
Among other laws regarding the princes of this rank, it was enacted that the heir-aparent should be held in the greatest honor, after the King and Queen; that at table he should have the chief guest of the day on one side of him, to awaken his interest by stories of travel, and the chief falcomer on the other, to amuse him with incidents of sport. At the fire, he had a right to one corner, oppo site to that occupied by the sovereign; and if a solemn judge was placed next to him to fill him with judicial wisdom, he had behind him the Chief of the Bards, whom he could call upon for a song, when weary of the process of being filled with wisdom. There were even higher privileges than these enjoyed by the Prince of Wales before the Saxon era; I the Prince of Wales before the Saxon era. It was the duty of the royal father (as I have before recorded) to pay all their expenses ungrudgingly; and never to grumble at any extravagance of banquet or amount of good liquor called for by the Prince and his companions who officially attended him. The servants of his very household were not paid for out of the Prince's privy purse, but out of that of his much-suffering and dutiful sire. The horses of his stud, his carfack or warcharger not excepted, were provided after the same agreeable fashion; and the only curb, or seeming curb, placed upon the Prince himself, was to be found in the regulation hid down, to the effect that the Prince was never to make a night of it out of the palace—unless he chose to do so! While he was away, his gentleman woodman looked to the away, his gentleman woodman looked to the maintaining of a good fire in his bed-room same official put on another fagot or two and carefully closed the door, in order to keep out the thleves, the wind, and the wolves.
